

"The Best Açai From the Amazon in the World!"

What is Açai

We take great care to ensure you always receive **Certified Organic, Bio-active, Whole Fruit Açai Berry with NO additives or fillers of any kind**. Our Açai is imported from the pristine Amazon rainforest, where local farmers reap the blessing of a worldwide market through Açai. Once harvested, the antioxidant rich berries, both juice and skin, are organically **freeze-dried within 48 hours** to ensure maximum freshness.

Be sure your Açai is a very deep dark purple (almost black) in color! (top left example)

Açai that has been over pasteurized and/or has added citric acid will be stripped of its natural color and will appear various shades of light purple or even brown. Don't be fooled by pretty packaging claiming pure Açai now that you know this simple test!

Our Açai is Nutrient Rich and packed with Vital Omega Fatty Acids and Antioxidants. We don't take shortcuts with over-pasteurization or by adding preservatives to double the shelf life of our açai, like other companies who care more for their bottom line than the health and well-being of their customers.

Our Organic Amazon Açai is freeze-dried for optimum freshness and has **7 times the nutrients** than frozen Açai fruit, ounce for ounce! That's because it takes 7 pounds of açai fruit, to make just 1 pound of our freeze-dried açai powder - what a great way to maximize the effectiveness of this amazing super food!
